Luoluo Liu

Data Scientist, Philips Research North America, Cambridge, MA, USA
443-255-9100 ⋆ ○ ⋆ elydia.777@gmail.com

PROFESSIONAL SUMMARY

Specialized in Machine learning and deep learning, Artificial Intelligence for applications such as classification, regression, object detection, time-series and other applications in the field of signal processing. Proficient using Python, MATLAB to develop prototypes and practical solutions. Extensive experience in health-care industry in 3 healthcare companies with 3+ years experience. Capable of working independently as well as with teams. 4 patent application, 8 invention disclosures and 4 grant proposals.

EDUCATION

Johns Hopkins University, Baltimore, MD, USA *December 2019*
Ph. D. in Electrical and Computer Engineering (**Machine Learning**);
M. S. E. in Applied Math and Statistics (**Statistics and Optimization)** *May 2019*
M. S. E. in Electrical and Computer Engineering *December 2014*
GPA: 3.92/4.00

Xinan Jiaotong University, China *June 2013*
B.S. in Electrical Engineering
GPA: 91.8/100, Rank: 1/425, Outstanding Graduate (2013)
National Scholarship , Ministry of Education of the P.R. China (Top 0.7%)

COMPUTER SKILLS

- Expertise in Python, MATLAB, R for modeling, simulation, and developing optimization algorithms; data processing and visualization.
- Proficient in Pandas, Numpy, Scikit-learn, Matplotlib,
- Proficient in PyTorch, Keras, TensorFlow
- Experienced with Pyspark, SQL
- Experienced with Bash script for jobs management in school-owned cluster and AWS
- Experienced with SVN, Git
- Word and LaTeXfor technical writing; Powerpoint for presentations

WORK EXPERIENCE

Philips Research North America, Cambridge, MA Jan 2020 - present
Data Scientist

- Analytic and predictive modelling for Philips Patient Flow Capacity Suite (PFCS)
- Publishing works on Interpretable top comorbidities of recurrent patients and readmission risk
- Time-series modelling for clinical decision support using EMR, physiological signals and continuous monitoring (respiratory waveform, ECG,PPG, Capnography, breath sound and heart sound) data
- Writing invention disclosures and grants applications

Selux Diagnostics, Boston, MA May 2019 - Dec 2019
Algorithm Intern, Algorithm Engineer

- Addressing data imbalance and reference noise issues in large-scale machine learning problem
- Developing machine learning in production code (using ETL code and interact with SQL database)

Siemens Healthineers, Princeton, NJ May - August 2018
Deep Learning Research Intern

- Developed 2-dimensional and 3-dimensional(3D) Neural Networks for quality assessment of volumetric MR images
- Built a 3D motion simulation on volumetric and 3D MR images to generate training data for deep learning
- Use adversarial training for domain adaptation using Generative Adversarial Networks with team

Johns Hopkins University, Baltimore, MD September 2013 - December 2019
Research Assistant (with Prof. Trac Tran and Prof. Peter Chin)

- Proposed a framework to improve generalization of neural network to be able to perform images classification using VGG network as well as object detection using Faster R-CNN with arbitrary partial observation ratios
- Employed sparse Dictionary Learning to Thalamus Segmentation from MRI images for automatic segmentation, even on cases that is challenging for human to delineate the thalamus
- Created a novel alternative improved method to sparse recovery: a collaborative scheme from multiple bootstrapping samples to improve the performance of regression and studied the theoretical properties
- Improved the conventional Bagging in sparse regression by reducing the bootstrap ratio and proved the trick theoretically
- Developed an efficient Partial Face Recognition algorithm using Dictionary Learning approach to test on partial image patches without retraining
- Developed the reconstruction algorithm of Random Replicate Mirror Imaging System to perform system calibration and recovery of the scene pictures
- Proposed a novel and robust blind watermarking scheme based on wavelet tree
- Solved the Interference Alignment for MIMO wireless communication problem numerically

Teaching Assistant September 2014 - May 2018

- Courses: Compressed Sensing & Sparse Recovery; Wavelets & Filter Banks; Intro. to ECE
- Worked with non-experts; Conveyed complicated ideas in simple ways; Coordinated with other TAs and the lab manager

PUBLICATIONS
